(54) **Filling material for soft tissue implant prostheses and implants made therewith**

(57) A new soft tissue implant filling material is disclosed. The material may be polyvinylpyrrolidone, polyvinyl alcohol, hydroxypropylmethyl cellulose, polyethylene oxide, hyaluronic acid, sodium or calcium alginate,

hydrogel polyurethane, hydroxyethyl starch, polyglycolic acid, polyacrylamide, hydroxyethylmethacrylate (HEMA), and several naturally derived biopolymers including sodium kinate, seaweed, and agar.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

See sheet -B-

- ☒ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☐ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

European Patent
Office

EP 96 30 0768 -B-

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1 (partially); 2-5, 15-18 (completely) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of polyvinylpyrrolidone.
2. Claims 1 (partially); 6-11 ; 13 (completely) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of hydroxypropylmethyl cellulose, hyaluronic acid, sodium or calcium alginate, hydroxyethyl starch and several naturally derived biopolymers including sodium kinate, seaweed and agar.
3. Claims 1 (partially); 12 (completely) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of polyvinyl alcohol.
4. Claims 1 (partially); 14 (completely) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of polyacrylamide.
5. Claim 1 (partially) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of polyethylene oxide.
6. Claim 1 (partially) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of hydrogel polyurethane.
7. Claim 1 (partially) :
An implantable soft tissue prosthesis comprising a hollow shell and a filling material comprising a gel or viscous liquid consisting of hydroxyethyl methacrylate (HEMA).
